ABOUT ME

Software Engineer with practical industry experience building high-performance web applications. Specializing in modern frontend architecture with a proven track record of developing scalable, data-driven user interfaces. Passionate about bridging web development with artificial intelligence to build intelligent, real-world platforms.

WORK EXPERIENCE

Smart Forum (formerly Central Asia Cellular Forum) – Islamabad, Pakistan

Email address: zarak@smartforum.org

Junior Software Engineer

[06/2026 – Current]

- Engineered the frontend architecture for real-world applications, including "Dentally" - an AI-powered receptionist platform for automated calls and booking using **Next.js**, **TypeScript**, and **Redux Toolkit**. Built responsive, accessible user interfaces by leveraging **Tailwind CSS** and **shadcn/ui** for scalable, modern styling. Seamlessly integrated RESTful APIs to connect complex UI components with backend services, ensuring high performance and a smooth user experience.

Key Skills: Next.js, React.js, TypeScript, shadcn/ui, Tailwind CSS, Redux Toolkit (RTK), REST APIs, Git.

Smart Forum (formerly Central Asia Cellular Forum) – Islamabad, Pakistan

Website: smartforum.org | **Business or sector:** Professional, scientific and technical activities

Frontend Web Developer (PSEB Apprenticeship)

[11/2025 – 06/2026]

- Engineered dynamic, strictly-typed **React.js** and **TypeScript** interfaces using **Ant Design** to deliver responsive corporate dashboards. Managed complex application state via **Redux Toolkit (RTK)** and built scalable styling systems with **Styled Components**. Optimized component reusability and UI load speeds within Agile development workflows.

Key Skills: React.js, TypeScript, Redux Toolkit (RTK), Styled Components, Ant Design (Antd), JavaScript (ES6+), HTML5, CSS3, Git, REST APIs.

Trustech Solutions – Peshawar, Pakistan

Jr. Web Developer (Concurrent Role)

[11/2024 – 04/2025]

- Developed simple web applications and user interfaces using **HTML**, **CSS**, and **JavaScript**. Worked alongside senior developers to fix minor bugs, improve page load speeds, and connect the frontend to **Node.js**, **Mongo DB**, and **MySQL** backends. Successfully built two major projects during this time.

Key Skills: HTML, CSS, JavaScript, Git, Team Collaboration

PROJECTS

[12/2024 – 04/2025]

FYP CONNECT: Smart Sugar Management System

Role: Frontend /Full-Stack Developer (Collaborated with 2 others) | **Grade: A+**

- A full-stack web application designed to help diabetic patients in South Asia log daily glucometer readings, detect sugar level trends, receive AI-generated diet plans tailored to South Asian cuisine, and export monthly health reports for doctor visits. Built with Next.js, TypeScript, Supabase, and Google Gemini API.
- Collaborated in a 3-member team following module-based development

[05/2024 – 08/2024]

MoneyFlow – Personal Finance Tracker App **Role:** Frontend Developer | **Duration:** Academic Project (Client Collaboration)

Developed the frontend for a custom personal finance dashboard, enabling a business client to efficiently log, categorize, and monitor daily transactions.

- Built a responsive user interface using **JavaScript**, **HTML5**, and **CSS3** to seamlessly manage 300+ daily transactions.
- Integrated client-side components with a **Laravel/PHP** backend via RESTful APIs, optimizing data rendering and reducing load times by 30%.

Technologies used: JavaScript | HTML5 | CSS3 | Laravel | PHP | MySQL | REST APIs

Exynos Cooky - E-Commerce Bakery Dashboard Developed a dynamic e-commerce dashboard application for a bakery to efficiently manage products, user interactions, and storefront data.

- Architected a strictly-typed, scalable frontend using **React** and **TypeScript**, leveraging **Ant Design** and **Styled Components** for a highly responsive and polished UI.
- Managed complex application state with **Redux Toolkit (RTK)** for seamless data flow and successfully deployed the production-ready platform on **Vercel**.

Technologies used: React | TypeScript | Redux Toolkit (RTK) | Ant Design | Styled Components | Vercel

EDUCATION AND TRAINING

Bachelors of Science in Software Engineering

Sarhad University of Science & Information Technology [03/2021 – 09/2025]

City: Peshawar | **Country:** Pakistan | **Website:** <https://www.suit.edu.pk> | **Field(s) of study:** Information and Communication Technologies: • Software and applications development and analysis | **Level in EQF:** EQF level 6

- "Relevant Coursework: Advanced Data Structures, Software Design, Probability & Statistics, Differential Equations, and Automata Theory."

SKILLS

Core Technical Skills

React.js / RTK / JavaScript (ES6+) / Node.js / HTML5 / Antd / CSS3 / Tailwind CSS / Git / Github / Next JS / Supabase
